### **M5PFPeA, M5PFHxA & M4PFHpA**

The development of analytical methods for the accurate analysis of perfluorinated compounds in various matrices continues to be a priority for many laboratories. Although it is now possible to obtain many common perfluorinated compounds as quantitative reference standards, there are still a number of analytes for which carbon-13 analogues are not yet available.

For this reason, **Wellington** has synthesized **M5PFPeA**, **M5PFHxA** and **M4PFHpA** in order to complete our C4 to C12 series of mass-labelled perfluoroalkylcarboxylic acid reference standards and provide another option for a mass-labelled perfluorohexanoic acid.
